**Five Pawns Meets FDA's E-Liquid Manufacturer Registration Requirements Ahead of Deadline**

*Premium vapor liquid manufacturer lists 388 UPC product codes for sale*

**Irvine, CA – Dec. 21, 2016** – Five Pawns, Inc., today announced it received confirmation from the FDA that the federal agency has accepted the company's filing to continue to manufacture and sell its complete line of premium e-liquids in the US. Five Pawns filed the requisite documentation to the FDA on December 19, 2016, demonstrating its intention to comply well ahead of the product listing deadline. Executing on the FDA's requirements is mandatory for all companies that wish to continue to manufacture and sell ENDS and related products in the US.

“According to the FDA's regulations, only vapor product manufacturers who have established themselves as a manufacturer and registered their products in accordance with the federal guidelines will be allowed to continue to sell to the US market,” said Rodney Jerabek, chief executive officer of Five Pawns. “This is just the next logical step in our company's pledge to lead the industry by example. Five Pawns views this phase of the FDA compliance process as a continuation of our promise to be the global e-liquid brand of choice ‘then, now and forever’ for our customers and partners alike.”

On August 8th 2016, the FDA became the authority over electronic nicotine delivery systems and issued a set of regulations and registration deadlines pertaining to tobacco products, e-cigarettes, and e-liquids. The process began with a request for all manufacturers and sellers of vapor products to submit a Pre-Market Tobacco Application (PMTA) in the preparation of enforcement of stringent new rules for safety, quality standards, and consumer information. Manufacturers and sellers of tobacco products, e-cigarettes, and refill containers must

demonstrate they are working to meet the FDA regulations if they plan to continue to market their products past August 8th, 2018.

“Successfully executing on the registration of our establishment and product listings took another solid team effort from everyone at Five Pawns,” said Gavin Tucker, Five Pawns’ chief operating officer. “After our successful TPD notifications in the EU, we are proud to continue our effort to support the vaping industry distributors and retailers in the US and throughout the world.”

Five Pawns focused intently on delivering precisely what the FDA required and submitted a formal establishment registration along with a comprehensive product listing detailing the product descriptions for everything the company manufactures.

About Five Pawns:

Southern California-based Five Pawns is the world’s leading maker of premium vapor liquid. Five Pawns changed the vaping industry in 2012 with its line of “top shelf” premium vapor liquids, which elevated vapor liquid enjoyment to a connoisseur’s art the likes of fine wine and cuisine. When its debut Signature Line hit the market, vaping enthusiasts languishing in a world of one-dimensional flavors were blown away by the brand’s complex, sophisticated flavors.

Five Pawns' solo release in 2013 of Castle Long Reserve, the world’s first barrel-aged e-liquid, sold out worldwide in one week and became the most coveted vapor liquid in the world. The subsequent Mixology Edition delivers extraordinary flavor character comparable only to premium vintage spirits. With its absolute commitment to excellence, Five Pawns is unrivaled in the quality, assurance, and flavor complexities its vapor liquids provide. Taste Five Pawns for yourself at any one of over 1,000 authorized Five Pawns premium vapor liquid retailers worldwide. Now it’s your move: [www.fivepawns.com](http://www.fivepawns.com)
